DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, 32-36 and 38-73, drawn to a method of screening for compounds that inhibit melanogenesis comprising treating cells expressing a tyrosinase-encoding gene with a test compound that inhibits melanogenesis, classified in class 435, subclass 7.23. Claims 32-35 and 38-43 will be examined with this Group to the extent the method reads on inhibiting P protein.
 - II. Claims 18-35 and 37-43, drawn to a method of screening for compounds that increase melanogenesis comprising treating cells expressing a tyrosinase-encoding gene with a test compound that increases melanogenesis, classified in class 436, subclass 64. Claims 32-35 and 38-43 will be examined with this Group to the extent the method reads on increasing P protein.
 - III. Claims 44-69, drawn to methods of decreasing melanin production in a melanocyte and reducing skin pigmentation, classified in class 424, subclass 9.1.
 - IV. Claims 70-82, 91 and 92, drawn to a pharmaceutical composition for reducing skin pigmentation and a kit containing said composition, classified in class 514, subclass 177.

Art Unit: 1642

- V. Claims 83-90, drawn to a method of activating melanogenesis comprising contacting a melanocytes with a compound that inhibits ATPase, classified in class 424, subclass 78.02 .

2. The inventions are distinct, each from the other because of the following reasons:

Inventions III-V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product of Group IV can be used in either Group III or V.

Inventions I-III and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of method Groups I-III and V comprise different method steps, which yield different results and endpoints.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1642

4. A telephone call was made to Robert McIsaac, Ph.D. on June 27, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
